Risk Assessments to minimise the risk of being exposed to Covid-19

The process involved consultation with all school staff.

Methodology used for hazard identification and control

In line with the requirements of Safety, Health and Welfare at Work Act 2005 (section 19) it is the policy of the BoM in St. Senan's N.S. to address significant hazards and risks in the workplace, to access the risks to safety, health and welfare and to control these risks as far as is reasonably practicable.

The Board is committed to the ongoing identification of hazards, the assessment of the appropriate risks and the introduction of controls to deal with them. In addition, staff are involved and participate in safety, health and welfare issues within the school and are encouraged to identify and report any potential hazards that may exist and to ensure that a risk assessment is carried out.

This revised Risk Assessment includes all relevant updates and necessary control measures to minimise the risk of staff and others being exposed to Covid-19 and these will be incorporated into the Safety Statement for St. Senan's N.S. Projects in line with requirements of section 20 of the 2005 Act.

It is envisaged that additional reviews will be undertaken on a regular basis and in line with Government and public health advice to ensure that all information remains accurate, that controls are appropriate and where necessary risks are reassessed.

A hazard is anything with the potential to cause harm to the safety, health or welfare of staff, students, visitors and contractors – a wet or slippery floor, an unguarded machine, stressful work, a blocked entrance, hazardous chemicals etc. Hazards may be classified as physical, chemical, biological, environmental or human.

A **risk** is the likelihood that someone will be harmed by a hazard and the severity of that harm.

ST. SENAN'S N.S.

Control measures:

A control measure is an applied measure that reduces the level of risk. Control measures can be applied at the planning stage, can comprise physical measures, can be management issues and can include training. Good control measures will require a combination of some or all of these.

Control measure principles:

Schedule 3 of the Safety, Health and Welfare at Work Act 2005 lists the Principles of Prevention and the Board of Management undertakes to apply these principles (where practicable) in dealing with all risks within the school:

- Avoidance of risks
- Evaluation of unavoidable risks
- Combating of risks at source
- Adaptation of work to the individual
- Adaptation of workplace to technical progress
- Replacement of dangerous articles, substances or systems of work by safe or less dangerous articles, substances or systems of work
- Priority to collective protective measures over individual protective measures
- Development of an adequate prevention policy which takes account of technology, organisation of work, working conditions, social factors and the influence of factors relating to the working environment
- Appropriate training and instructions to employees.

When the safety audit identifies hazards, it is necessary to evaluate and rank them so that they can be controlled in an orderly way. The risk of a hazard is a measure of the likelihood or probability of an accident coupled with the severity of the injury or loss. The risk potential of each hazard was assessed (by ranking) by giving numerical values of between 1 and 5 to both the **severity** of the consequences and the **probability** of the event occurring. When the severity numerical factor and the probability numerical factor were multiplied together, they produced a number between 1 and 25 thereby producing the numerical values outlined in **risk rating** chart below.

ST. SENAN'S N.S.

Severity

Severity Rating	Interpretation	Numerical Value
Fatality or Catastrophic	Fatality or Catastrophic Single or multiple fatalities, widespread illness, large scale property or equipment damage	
Major	Serious injury or illness, significant property or equipment damage	4
Moderate	Injury and damage to property	3
Minor	Minor injury or illness, minor property or equipment damage	2
Trivial	No significant injury or illness, no significant property or equipment damage	1

Probability/Likelihood

Probability Rating	Interpretation	Numerical Value
Inevitable	Inevitable Likely to occur either immediately or in the short term	
Very Likely	Could occur in time or if repeated enough	4
Likely	Likely to occur	3
Unlikely	Unlikely Though unlikely, may occur over time	
Rare	Unlikely to occur at all	1

ST. SENAN'S N.S.

*Note: A numerical rating has been used in column 4 of the risk assessment sheets to describe the risk potential for the hazard identified This method has been used in an attempt to ensure that the levels of risk will be understood and clear to all those operating within the school.

Who may be affected?	Identified Risks	Risk Communication, Education and Training Controls	Risk Rating with controls	Action implementation
	most at risk of complications if they catch the coronavirus are: • 60 years of age and over • have long-term medical	The Board of Management will develop a response plan for the prevention and mitigation of Covid-19 following a risk assessment of the school facility. This plan will highlight the measures necessary to protect the health and safety of staff in re-opening and modifying the work arrangements within the school. The staff representative(s) will be properly consulted when developing and implementing the action plan for the prevention and mitigation of Covid-19 within the school and all staff will be informed about the measures being introduced, using specific risk communication and	Negligible	Board of Managemen Principal Staff

		Controls	with controls	
Staff Pupils Visitors Contractors	Persons currently deemed most at risk of complications if they catch the coronavirus are: • 60 years of age and over • have long-term medical conditions – i.e. heart disease, lung disease, high blood pressure, diabetes or cancer • pregnant women Known effects of the coronavirus: • A fever (high temperature of 37.5 degrees Celsius or above) • A cough - this can be any kind of cough, not just a dry cough • Shortness of breath or breathing difficulties • Loss of sense of smell • Loss of sense of taste or distortion of sense of taste • Death	 ✓ Appoint an appropriate person for dealing with suspected cases. ✓ Have a designated isolation area available within the school building. The designated area and the route to the designated area should be easily accessible and as far as is reasonable and practicable, should be accessible by people with disabilities. The possibility of having more than one person displaying signs of Covid-19 needs to be considered so having additional isolation areas available or another contingency plan for dealing with additional cases must be planned. It would be important that the designated area has the ability to isolate the person behind a closed door and away from other workers If a person displays symptoms of Covid-19 the following procedure is to be implemented: ✓ Isolate the person and have a procedure in place to accompany the individual to the designated isolation area via the isolation route, keeping at least 2 metres away from the symptomatic person and also making sure that others maintain a distance of at least 2 metres from the symptomatic person at all times. ✓ Provide a mask for the person presenting with symptoms if one is available. He/she should wear the mask if in a common area with other people or while exiting the premises. ✓ Assess whether the individual who is displaying symptoms can immediately be directed to go home and call their doctor and continue self-isolation at home. ✓ Facilitate the person presenting with symptoms remaining in isolation if they cannot immediately go home and facilitate them calling their doctor. The individual should avoid touching people, surfaces and objects. Advice should be given to the person presenting with symptoms to cover their mouth and nose with the disposable tissue provided when they cough or sneeze and put the tissue in the waste bag provided 	Requires monitoring	Board of Management Principal Staff

Who may be affected?	Identified Risks	Identified Risks Controls		Action implementation
Staff	 they catch the coronavirus are: 60 years of age and over have long-term medical conditions – i.e. heart disease, 	Where a staff member exhibits any signs of Covid-19 or has been exposed to a confirmed case they should not travel to work. Wherever possible, staff should travel to work alone using their own means of transport – staff should not share transport to or from work. If availing of public transport, sit down to minimise contact with frequently touched surfaces, handles,roofstraps,isolation bars, etc. Wear a face mask and carry hand santiser (at least 60% alcohol) and use it regularly throughout your journey.	Requires monitoring	All staff

Risk Level Calculation (a) Severity of risk/injury 1=trivial, 2=slight, 3=moderate, 4=major, 5=fatality (b) Likelihood of event 1=rare, 2=unlikely, 3=likely, 4=very likely, 5=inevitable	Risk Level Action 1-5 Trivial risk Acceptable 6-10 Medium risk Requires monitoring
(c) Risk Rating = (a) X (b)	11-15 Severe risk Requires immediate further action and control 16-25 Emergency risk Halt activity and review immediately

Who may be affected?	Identified Risks	Dropping off and picking up of pupils	Risk Rating with controls	Action implementation	
		Controls		·	
_	most at risk of complications if they catch the coronavirus are: • 60 years of age and over • have long-term medical conditions – i.e. heart disease, lung disease, high blood pressure, diabetes or cancer • pregnant women Known effects of the coronavirus: • A fever (high temperature of 37.5 degrees Celsius or above)	Arrangements for dropping off and picking up pupils from the school facility will be organised to maintain, as far as is reasonably practicable, a safe social distance between drivers/parents/guardians and all school staff. Where pupils travel by public transport the Board of Management will provide a designated drop off/awaiting area (where possible) that supports social distancing measures. It expected that there will be pre-agreed staggered arrival times for school buses. Parents/guardians will be encouraged to wait in the car outside of the school Where SEN pupils are dropped off and picked up by a private bus/taxi, the accompanying adult should remain in the car/bus with the pupil. A designated staff member will come to the car/bus to receive the pupil and will avoid or limit physical contact with the accompanying adult. Subject to available space there is no strict requirement for taxis/buses to arrive one at a time provided that those accompanying the pupil remain in the taxi/bus and do not interact with those accompanying other pupils. A similar process should be followed for pick up.	Requires monitoring	Board of Management Principal Staff Bus and taxi drivers	

Risk Level Calculation (a) Severity of risk/injury 1=trivial, 2=slight, 3=moderate, 4=major, 5=fatality	Risk Level Action 1-5 Trivial risk Acceptable
(b) Likelihood of event 1=rare, 2=unlikely, 3=likely, 4=very likely, 5=inevitable (c) Risk Rating = (a) X (b)	6-10 Medium risk Requires monitoring 11-15 Severe risk Requires immediate further action and control 16-25 Emergency risk Halt activity and review immediately
